WRITING A NOVEL

My project is writing a novel. In second semester I had a creative writing class and in November, we started writing novels. Everyone in the class was required to write a 50,000 word novel by the end of the month, but a lot of people hadn't finished by the end of the months so it became more of a second term project. By the end of the first semester I still hadn't finished and by then it had become something I was doing a lot, and I got really into it. After the first semester ended I decided I didn't want to stop writing, so I made it my plus time project. I really love writing and when I grow up I hope to be an author or a lawyer. And if I can then possibly an singer/songwriter.

I LOVE writing. It's one of the few productive things I do in my free time and I really enjoy it. I recently started playing the guitar, but I'm teaching myself with a little help from my dad and older sister. I've been playing the piano since I was about seven, I started playing the flute in third grade and I just started beginning percussion this year along with choir and voice lessons. I love learning about US history along with Greek myths, British history, and a lot of European history. I can't draw (this may be from lack of trying) I have two older siblings, one sister Kailey who is three years older than me and Seth my older brother who is two years older than me. I have two dogs who are annoyingly loud and I love listening to music or playing piano or guitar while singing, but I'm deathly afraid of singing in front of people and try to stay away from it as much as I can. I play a lot of soccer but other than that I don't understand sports. Summary of me now over.

# CALLAN FRANKLIN

## COMPILATION OF ANCIENT MILITARY TREATISES

Callan Michael Franklin, was born on September 23, 2003 in Orem Community Hospital. He moved around a lot going from Provo Utah, Marugame Japan, back to Provo then to Athens Ohio, Lubbock Texas back to Provo, then to Springville and now finally in Provo once again. His family consists of 2 siblings Nolan 10, Ian 7 and his parents Joey and Melissa. They have a Soft Coated Wheaten Terrier mixed with a Tricolor Collie, she is 3 ½ years old.

He enjoys learning (and sometimes teaching) about Quantum Physics, Molecular Physics, normal Physics, Chemistry, and String theory (this includes M-theory and Superstring theory). He also has a large interest in Fission/Fusion and a (probably) unhealthy obsession with all things that go boom and the firing platforms. One of his main interests is military history and tactics (which is part of the reason he did the project he did). Callan is especially interested in space travel especially the (kind've) theoretical Alcubierre Drive and Bussard Ramjet. He also reads too much (in everyone else's opinion but his own) and Callan has been grounded from reading before. A few of the reasons why he did this project included his interest in military history and tactics, the fact that there has never before been a compilation of military treatises before.
